\$1.1 billion (2021)

COOPERATOR FACT SHEET

ABOUT SUSTAINABILITY

Vision/mission statement

USLGE is committed to advancing sustainable animal agriculture globally. By matching international producers with leading, progressive U.S. livestock breeders and providing educational and technical support, USLGE strives to ensure a continued safe, secure, and nutritious food supply while balancing the preservation of land and natural resources with economic growth and profitability for all. USLGE is a member of the U.S. Sustainability Alliance.

Key areas of focus

Education, technical support, lowering environmental impact of animal agriculture.

Accomplishments with historic/trend data

We match international producers with leading progressive livestock genetics that are best suited for their needs, economy, and environment. We also provide education on how to fully reach genetic potential of imported livestock.
